## Money EP

(Konkord044/Hoanzl/Broken Silence)

### Money makes happy.

In times like these, what seems more likely than circulating some money? - This is also what author, musician and concept artist **Paul Divjak** thought. And to be precise: the dough materialized on to some vinyl, and attractively comes along as a 180g club edition. Crisis-proof!

The artist brought a plenty friends of the Austrian electronica and club music scene on board for this sexy joint-venture called **Money**, namely **Erdem Tunakan, Tapiresque, Hans Platzgumer, de:con, B.Fleischmann** and **i-wolf**. The latter as up-trend producer also being in charge of the effective money-flow. None less than top sound-manager **Patrick Pulsinger** took care of success-driven mastering.

**Money's** musical portfolio offers six interpretations of Divjak's track. It's an overall floorfiller with optimal performance. The trend channel offers strategic minimal techno and appealing electro as well as liquid cash-cow dub and booming uptempo shoegaze.

**Money** sure is fun. It is music that stirs. It is as easy as this for reality to become danceable. - **Money** simply makes everyone happy.
